Question:

Read the passage carefully and answer the questions :

In the Midst of the July 1966 hunger strike I had my second visit from my wife. It was almost exactly two years after the first visit, and it nearly did not happen at all. Winnie had been under constant harassment since her first visit in 1964. Her sisters and brother were persecuted by the police, and the authorities attempted to forbid anyone in her family from living with her. Some of this I learned at the time, much of it I found out later. Some of the nastiest items were known to me because when I would return from the quarry, I often would find neatly cut clippings about Winnie that had been anonymously placed on my bed by the warders.

In small and spiteful ways, the authorities did their best to make Winnie's journeys as unpleasant as possible. For the previous two years, her visits had been stymied by local magistrates and by the repeated bannings that prevented her from traveling. I had recently heard through counsel that Winnie had been informed by the police that she could visit me only if she carried a pass. Winnie, who had been protesting the government's policy regarding women's passes since the 1950s, rightly refused to carry the hated document. The authorities were clearly attempting to humiliate her and me. But I thought it was more important that we see each other than to resist the petty machinations of the authorities, and Winnie consented to carry a pass. I missed her enormously and needed the reassurance of seeing her, and we also had vital family matters to discuss.

The regulations governing each of Winnie's visits were long and complicated. She was barred from taking a train or car and had to fly, making the trip much more expensive. She was required to take the shortest route from the airport to Caledon Square, the Cape Town police station, where she was required to sign various documents. She had to report to the same station on the way back and sign more documents.

According to the passage, which one of the following options did not contribute to make Winnie's visits complicated :

- (1) Winnie was barred from taking a car or train
- (2) Winnie had to take expensive flights
- (3) Winnie had to carry outdated magazines with her
- (4) Winnie had to sign various documents

Question:

Read the passage carefully and answer the questions :

In order to identify potential for intellectual and educational progress, the literacy rate of a country covers the level of education and skills acquired by a country's inhabitants. Literacy is an important indicator of a country's economic progress and the standard of living - it shows how many people have access to education. However, the standards to measure literacy cannot be universally applied. Measures to identify and define illiterate and literate inhabitants vary from country to country : In some, illiteracy is equated with no schooling at all.

Globally speaking, more men are able to read and write than women, and this disparity is also reflected in the literacy rate in India - with scarcity of schools and education in rural areas being one factor, and poverty another. Especially in rural areas, women and girls are often not given proper access to formal education, and even if they are, many drop out. Today, India is already being surpassed in this area by other emerging economies, like Brazil, China, and even by most other countries in the Asia - Pacific region. To catch up, India now has to offer more educational programs to its rural population, not only on how to read and write, but also on traditional gender roles.

The introductory paragraph of the passage deals with :

- (1) India and it's education policy
- (2) American dream
- (3) Global literacy
- (4) School education for women in Kerala

- (1) Big school, college and university only
- (2) A smart banking system only
- (3) Prosperous, healthy, educated and an ethical society that is inclusive, fair and progressive
- (4) Few traders and business houses grow big

Question:

Read the passage carefully and answer the questions :

In order to identify potential for intellectual and educational progress, the literacy rate of a country covers the level of education and skills acquired by a country's inhabitants. Literacy is an important indicator of a country's economic progress and the standard of living - it shows how many people have access to education. However, the standards to measure literacy cannot be universally applied. Measures to identify and define illiterate and literate inhabitants vary from country to country : In some, illiteracy is equated with no schooling at all.

Globally speaking, more men are able to read and write than women, and this disparity is also reflected in the literacy rate in India - with scarcity of schools and education in rural areas being one factor, and poverty another. Especially in rural areas, women and girls are often not given proper access to formal education, and even if they are, many drop out. Today, India is already being surpassed in this area by other emerging economies, like Brazil, China, and even by most other countries in the Asia - Pacific region. To catch up, India now has to offer more educational programs to its rural population, not only on how to read and write, but also on traditional gender roles.

They are fleeced and fooled on account of their ignorance. Half the ills of man are due to ignorance.

According to the passage, we the Homo sapiens are different from the beasts because :

- (A) We have strong sense of smell and sight unlike some of the predatory animals
- (B) We were able to develop our brains and our social instinct over the past millions of years unlike the other animals
- (C) we did not evolve like other animals did
